DETAILED ACTION

Drawings

1. Figures 23 and 24 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 35 and 36 are objected to because of the following informalities: In claims 35, line 2, and 36, line 2, "a metal part" should be changed to --the metal part--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. Claim 59 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 59 recites the limitation "the magnetic main path member" in lines 1 and 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 33-35, 37-39, 41 are rejected under 35 U.S.C. 102(e) as being anticipated by Ihara et al (US Patent 7,170,462).

Ihara et al disclose, in figure 1, a magnetic antenna comprising magnetic main path member 21, a coil 11 wound around a ferrite core 21, a magnetic sub-path members (12,6,19) bent in direction away from a housing 3 and having a gap 13.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 42-46, 55, 56, 59, 60, 65-67 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ihara et al.

The patent to Ihara et al, described above, differs from the claimed invention because it does not disclose the different permeability between the magnetic main path member and the magnetic sub-path members, and between the case and the magnetic

core. However the specific permeability is considered an obvious matter of design choice depending upon the desired characteristic of the antenna system. Regarding claims 65-67, the antenna which is used in the timepiece, keyless entry system, and RFID system is considered the intended use.

Allowable Subject Matter

8. Claims 36, 57, 58, 61-64 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
9. Claims 47-54 are allowed.
10. The patents to Gonser, Ikeda et al, Shigemoto, Ohara et al, Miami et al, Araki et al, and Tsukahara et al are cited as of interest showing the antenna similar to that disclosed.
